SUMMARY

Data Analyst with hands-on experience in **data quality analysis** and **business process operations** at a global IT services firm, paired with a self-driven portfolio of **SQL**, **Python**, **Power BI**, and **Tableau** projects. Comfortable turning raw, messy datasets into clean, decision-ready dashboards and reports. Currently transitioning into a dedicated **Data Analyst / BI Analyst** role, with parallel freelance data and automation work.

EXPERIENCE

BPO / Data Quality Analyst -- Tata Consultancy Services (TCS) Sept 2025 -- Present

- Perform **data quality checks** across client-facing systems for international clients, identifying and resolving inconsistencies to support SLA compliance.
- Analyze and process business data to improve operational efficiency, collaborating cross-functionally to resolve recurring workflow bottlenecks.
- Document quality-check procedures and edge cases to support consistent handoffs across the team.

Data Analytics Job Simulation -- Deloitte (via Forage) Apr 2026 -- May 2026

- Completed a virtual job simulation covering real-world **data analytics** and forensic technology tasks, including an equality-scoring exercise across factory locations.
- Practiced translating raw operational telemetry into an executive-ready view for non-technical stakeholders.

PROJECTS

Sales Performance Dashboard -- Excel

- Built a two-sheet, 1,499-row Excel workbook with a fully formula-driven dashboard (**SUMIF**, **LARGE**, **INDEX/MATCH**) and native charts that update automatically as source data changes.

SQL Data Analysis -- SQLite

- Designed a normalized relational database (28,000 orders, 600 customers, 20 products) and benchmarked query optimization before/after indexing using **EXPLAIN QUERY PLAN**.
- Used window functions (**RANK**) to surface top-selling products within each category.

Customer Segmentation & Marketing Analytics -- Tableau

- Built an RFM-based segmentation model across 3,200 customers and 20,000+ transactions using LOD expressions and quintile scoring, classifying customers into 7 actionable segments.
- Layered in campaign spend and conversions across 6 channels to surface budget-reallocation opportunities.

Adaptive RAG Chatbot -- Python, Streamlit, FAISS, LangGraph

- Built and deployed a retrieval-augmented chatbot (SQLite-backed) to Streamlit Community Cloud, and embedded a live widget version into my portfolio site via a GitHub Actions deploy pipeline.

EDUCATION

Bachelor of Business Administration (BBA) -- JECRC University, Jaipur 2022 -- 2025
CGPA: 7.37 / 10.0

SKILLS

Languages / Query	SQL (Intermediate), Python (Basic)
BI & Visualization	Power BI, Tableau, Excel (advanced formulas, dashboards)
Core Competencies	Data Cleaning, Data Quality Assurance, Dashboarding, Business Process Analysis
